

PROJECT NAME: Perry City Fiber Optic Network

RECIPIENT: Perry City

LOCATION: Perry, Utah

PURPOSE:

To complete placement of conduit and fiber optic cable, as well as to complete the connections to the Perry City fiber optic hub. The priority area for service will be in the Pointe Perry and Upland Square commercial areas, in the northwest area of Perry City, bordering Brigham City.

This will provide for municipal type services that are in high demand by residents and businesses. Moreover, this project will provide fiber optic services in neighborhoods where other forms of internet, phone and television services are limited or not yet available. Finally, this project will provide for competition for a variety of service providers.

It is anticipated that the economic development described above will not only provide for additional jobs, but will also provide additional sales and property tax base, which will benefit the City and its taxpayers.

AMOUNT: \$750,000
